

APPENDIX A

DATA FIELDS ON THE PARAMETER SCREENS

And

ACRONYMS

Arranged Alphabetically

BOSS - Base Operations Support System

BOSS Doc # - The Base Operations Support System Number - Assigned by the system at the time of input into BOSS. (8 character numeric field; i.e. 73466645). The 1st character is the last digit of the calendar year, the next three are the Julian date of input and the last 4 are a sequential number assigned by the system within a range of 6000-9999.

Contract # - The Hazardous Contract Number. (13 character alpha/numeric field; i.e. SP440098D0001).

Date Range - Two fields Begin Date and End Date. Enter your parameter dates. If using the Standard Parameter Screen, you must use this format 01-OCT-98. If using the Custom Parameter Screen, you may use either this format or the Julian Date (YYDDD i.e. 98270) in the appropriate space. (Julian Date - 5 character numeric field; Date Field - 9 character alpha/numeric field).

Del Ord - Delivery Order Number. (4 character alpha/numeric field; i.e. JA01 or 0023)

DTID Number - The Disposal Turn-In Document Number. Two separate fields in ERS, the Gen DOD and the Extent. The Gen DOD is the Generating Activity's Department of Defense Activity Address Code. (6 character alpha/numeric field; i.e. W31G1Z). The Extent is composed of a 4 digit Julian date YDDD and a 4 or 5 character serial number either alpha or numeric, (i.e. of an Extent - 91550001).

DODAAC - Department of Defense Activity Address Code - refer to DTID Number

ERS - Environmental Reporting System - a data warehouse storing Hazardous Disposal historical information.

Extent - Refer to DTID Number

Fund Code - Fund Code assigned to the Generating Activity (2 character alpha/numeric field; i.e. 2C)

Gen DOD - Refer to DTID Number

Generator Number - EPA Identification Number assigned to the base. (12 character alpha/numeric field, i.e.)

Hand Cd - Waste Handling Code (3 character alpha/numeric field; i.e. S01)

HIN - Hazardous Identification Number (6 character alpha/numeric field; i.e. 920200)

HLI - Hazardous Line Item

LIC - DRMO Like Item Code, assigned by DRMS-CCI. Use only the assigned code for your DRMO. (2 character alpha/numeric field; i.e. DRMO Anchorage = 7B)

Manifest Numbers (State) - Self Explanatory (8 character alpha/numeric field)

Manifest Numbers (MLI) - Self Explanatory (5 character alpha/numeric field)

MLI - Manifest Line Item

PIIN - Procurement Instrument Identification Number (the Contract Number, a dash, then the Delivery Order Number; i.e. SP440098D0001-0027).

PMT - Funding Agency Payment Code (1 character alpha field) A = Army, N = Navy, D = DLA, C = Coast Guard, F = Air Force, O = Other.

PU-DODAAC - DODAAC of the pickup site (for additional information on DODAAC refer to DTID Number)

QTY - Quantity (numeric field - length varies)

RAC - Region Activity Code (3 character alpha field; i.e. DRMO Lewis = WLC)

RAID - Rapid Access to Information in DLA Hazardous Systems (obsolete, replaced by ERS)

Transporter Number - Identification Number assigned to Transporter (12 character alpha/numeric; i.e. TXD074196338)

TSDF Number - Identification Number assigned to the Treatment, Storage, Disposal Facility [TSDF] (12 character alpha/numeric; i.e. ARD069748192)

Type Cd- Manifest Type Code ; P = Pickup, I = Interim, D = Final, R = Return to DRMO (1 character alpha field; i.e. P)

UM - Unit of Measure (2 character alpha field; i.e. EA)

Vendor - Contractor (5 character alpha/numeric field; i.e. 0CZ32)

Waste Num - Waste Code (4 character alpha/numeric field; i.e. D001)
